1. Current Working Environment (VS Code)

The screenshot shows the Visual Studio Code interface. On the left, the Explorer sidebar displays a project structure for 'SOFTWARE-ENGINEERING'. The files listed are: controllers (with bookingController.js), models (with bookingModel.js), views (with bookejs, index.ejs, and server.js), and package.json. The 'server.js' file is selected and its content is displayed in the main editor area. The code is a Node.js server using Express.js, EJS as the view engine, and includes routing for a booking application. The status bar at the bottom indicates the current file is 'server.js' on line 21, column 4, using UTF-8 encoding and LF line endings.

```
1  const express = require('express');
2  const path = require('path');
3  const bookingController = require('./controllers/bookingController');
4
5  const app = express();
6  const PORT = process.env.PORT || 3000;
7
8  // Set EJS as the view engine
9  app.set('view engine', 'ejs');
10 app.set('views', path.join(__dirname, 'views'));
11
12 // Routing (Lab 4)
13 app.get('/', bookingController.getHomePage);
14 app.get('/book', bookingController.getBookingPage);
15 app.post('/book', bookingController.submitBooking);
16
17 // Start Server
18 app.listen(PORT, () => {
19   console.log(`Server is running on http://localhost:${PORT}`);
20 });
21
```

master* O O A 0 Ln 21, Col 4 Spaces: 4 UTF-8 LF JavaScript
