

Software Engineering Resit Practical

Student Name: Girendra kumar thakur

Student ID: A00025476

GitHub Repository: <https://github.com/Thakurg2002/software-engineering>

Lab 1: Git Basics (Terminal output)

```
8e7f4e6 Add student details to README and footers
a83b449 Lab 3, 4, 5: Full Stack Environment, Routing, and MVC setup
461bb16 Lab 2: Add HTML views and Vanilla CSS
999b404 Initial commit for Cab Booking App
```

Lab 2: HTML Basics (index.ejs)

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <title>Premium Cabs - Your Ride, Elevated</title>
  <link rel="stylesheet" href="/css/style.css">
</head>
<body>
  <!-- Student: Girendra kumar thakur | ID: A00025476 -->
  <header class="navbar">...</header>
  <main class="hero">...</main>
</body>
</html>
```

Lab 3: Full Stack Dev Environment (package.json)

```
{
  "name": "software-engineering",
  "version": "1.0.0",
  "dependencies": {
    "ejs": "^3.1.10",
    "express": "^4.19.2"
  }
}
```

Lab 4: Routing requests (server.js)

```
const express = require('express');
const app = express();
const bookingController = require('./controllers/bookingController');

// Routing (Lab 4)
app.get('/', bookingController.getHomePage);
app.get('/book', bookingController.getBookingPage);
app.post('/book', bookingController.submitBooking);

app.listen(3000, () => console.log('Server running!'));
```

Lab 5: MVC Architecture (bookingController.js)

```
const Booking = require('../models/bookingModel');

exports.submitBooking = (req, res) => {
  const { pickup, dropoff, date, time, vehicle } = req.body;

  // Using the Model to save the booking (MVC Pattern)
  const newBooking = new Booking(pickup, dropoff, date, time, vehicle);
  newBooking.save();

  res.send('<h1>Booking Confirmed!</h1>');
};
```
